APPROVED AND EVALUATED BY THE COMMITTEE.

WHAT IS AN APPRENTICESHIP?

An apprenticeship is a four-year, paid-on-the-job training program in which an employee receives formal on-the-job training and classroom instruction in a specific trade or craft. The combination of classroom instruction and on-the-job training is designed to prepare individuals for a career in a skilled trade.

APPROPRIATENESS AND SKILL IMPROVEMENT PROGRAM

If you are interested in applying and know the qualifications:

APPLICANTS FOR APPRENTICESHIP
The 4 Year Equipment Operator Apprenticeship consists of 8000 hours of on-the-job training (40% on a minimum of 1440 hours per year of related instruction, and pass necessary learning (40%)) and a minimum of 1440 hours per year of related instruction. The apprenticeship program at Madison College includes a variety of classes in the trades and field experience.

Operating Engineers - Construction and Building Inspectors

Equipment operators perform the majority of the work force to ensure that the work is performed safely and efficiently. They are responsible for operating and maintaining the machinery and equipment used in the construction industry. This includes supervision, operation, and maintenance of all heavy machinery, from excavators and cranes to forklifts and trucks. The job requires knowledge of the construction process, as well as the ability to work safely and efficiently.
